Needs Assessment

- Initial consultation to understand your community-building requirements, objectives, and challenges.
- Identification of key collaboration and engagement goals for partners, customers, or employees.

Experience Cloud Portal Setup:

- We will build your partner portal within the Experience cloud, tailoring it to your specific preferences. The standard template will showcase up to four tabs, two components, and one audience, seamlessly customized through the point-and-click configuration features inherent in the Salesforce Experience Cloud.

Security:

- Your Role Hierarchy and Profiles will be configured by us to verify that the information presented in the portal is accurate and aligned with the correct data.

Ongoing Support:

- Provision of post-implementation support to address any issues or questions.
- Regular check-ins to ensure that Experience Cloud communities continue to meet evolving collaboration needs.

Best Practices and Optimization:

- Guidance on best practices for fostering community engagement and collaboration.
- Recommendations for continuous improvement and optimization of your Salesforce Experience Cloud setup.
